

TIP 11/12 – Hands vs Brushes

Highlight from the expert : Brushes are used for a precise makeup while you can use your hands for a more smudge and edgy finish.

- 1** – For any kind of makeup application, it is possible to use the fingers and the hand rather than makeup brushes. It will look smudge, natural and not too sophisticated.
- 2** – Put some foundation on the back of your hand, and use alternatively four of your fingers to apply your product.
- 3** – To apply your concealer, gently tap a small amount of product under your eyes, it will give you a natural look and it will decrease shadows under your eyes.
- 4** – Use your forefinger to apply your eye shadow. Whatever the texture, you easily blend it on your eyelid for a dramatic smoky effect.
- 5** – Use the middle finger to tap on lipsticks on your lips to diffuse color in a natural looking way.
